

### Haines Phillips Architects 10th Anniversary celebration

We were delighted to celebrate the tenth anniversary of our founding in 2007 with a party at Handel & Hendrix in London for clients, consultants and colleagues.

Haines Phillips Architects completed the extension and refurbishment of the listed former homes of George Frederick Handel and Jimi Hendrix in 2016. The project included the formation of a Learning Studio and Recital Room for Handel's House, and the creation of the Hendrix exhibition and restoration of Hendrix's bedroom. More details on the project can be seen on the project page [here](#).

Here's to the next ten years!
