

Mayfair Penthouse Apartment Completion

We have recently completed the extensive refurbishment and fitting out of a penthouse flat located within a Mayfair Art-Deco mansion block.

Our proposal for the internal remodelling entailed a new layout, which was achieved by completely demolishing and stripping out the internal partitions and fabric of the property. The design required careful consideration of the constraints presented by existing services and structural elements within the flat, and provided two double bedrooms, an en-suite bathroom, a shower room, kitchen and a spacious reception and dining room.

We were also commissioned with the interior fit-out design for this project, including the design of bespoke joinery, kitchen, bathrooms, door and cornice designs. Finishes and fittings were carefully selected to create a coherent and calm style throughout, fulfilling the client's desire for a contemporary interpretation of the Art-Deco style of the original mansion block.

Further details and photographs of other examples of our private client project portfolio can be viewed [here](#).
