

UPDATE Major Refurbishment Project for Listed Kensington Maisonette

Haines Phillips has obtained planning permission and listed building consent for the extensive refurbishment and fit out of a three bedroom maisonette, which is arranged over the ground and lower ground floors of a grade II listed four storey, terraced Georgian townhouse in Kensington.

Our design proposals are for a series of sensitive interventions to non-historic elements that will transform the property in to a high-quality, luxurious apartment, befitting of its location.

The proposals include the covering of an internal light-well at ground floor level using a structural glass floor to create a valuable external courtyard serving the kitchen and living areas and an additional daylight filled internal courtyard at the lower ground floor level below that serves the bedrooms.

Further details and photographs of other completed private client projects can be viewed [here](#).
